

# KRISHNAKUMAR LOGANATHAN

## SOFTWARE ENGINEER

Hello world! This is Krishna. A young and aspiring software developer, from India with huge interest in building scalable systems. An ardent believer in the decentralized world, problem solver, anime buff, and an absurdist.

## EXPERIENCE

**2021 - Present**

**Udaan.com**

### APPLICATION DEVELOPER - L2

- Working on logistics cluster of supply chain cluster, and systemising many manual flows.
- Built an app that reduces paper usage and cost in delivery hubs and thus saves ~5000 trees a year.
- Cut down data ingestion cost and time by over 80% for a database.

**2019 - 2021**

**Playment**

### SENIOR SOLUTIONS ENGINEER

- Engineered and maintained data pipelines of multiple clients.
- Worked closely with the product team on adding new features to product.
- Built many internal tools that reduces inter-team dependencies and increased productivity.

**2018- 2019**

**Datasee.ai**

### BACKEND DEVELOPER

- Built the entire backend system and infrastructure for the products as the initial member of the team.
- Bestowed with the "Performer of the Year" award for the year 2018-2019.
- Worked closely with the ML/DL team to deploy their models as service endpoints.
- Solely maintained the entire infrastructure.
